## 📍 Personalized

A personalized weather report that shows the best time and place for couples to enjoy outdoor activities based on their preferences and location.

## 📷 Gallery

A cloud gallery that allows users to upload and share their photos and videos of the sky and the weather with other users and get feedback and tips.

## ❤️ Mood Tracker

A mood tracker that analyzes the user's mood based on the weather and suggests activities, music, or quotes to cheer them up or calm them down.

## Plan Your Outdoor Activities with Ease

Get notified before rain stops.  
Plan your outdoor activities

- ✓ Share your weather stories and photos.
- ✓ Custom weather alerts and notifications.
- ✓ Smart weather integrations for your home.

Juniper is a great app for checking the weather. It's easy to use and has a beautiful interface. I love how it shows me the cloud patterns and predicts the weather for the next few days. It's like having a personal meteorologist in my pocket.

Priyanka

Happy Customer

I was sceptical about Juniper at first, but I'm glad I gave it a try. It's a whole new way of looking at the sky. It uses cloud technology to give me accurate and reliable forecasts, and it also has some fun features like cloud art and trivia. It's a must-have app for anyone who loves nature.
